L

L

The purest distillation of everything that we've done. A sublime balance of ultra-light engineering, intoxicating power, race-honed agility and pioneering electrification.

Artura is the next-generation hybrid supercar: all-new in every respect. From the advanced new McLaren Carbon Fibre Lightweight Architecture (MCLA) at its core. To the V6 twin-turbocharged hybrid petrol engine that forms its beating heart.

Technical design. Outstanding performance. Unparalleled driving dynamics. The McLaren DNA runs deep through every innovation, delivering a driver experience of unique intensity.

THE FULL FORCE OF MCLAREN.

HYBRID BLOODLINE

When it comes to pushing the boundaries of hybrid powertrain technology, McLaren has form.

The McLaren P1™ hypercar reset the limits with its 916HP hybrid engine and F1-derived technology. While the exquisite Speedtail used its electrified powertrain to achieve an earth-shattering maximum speed beyond 250mph, with luxurious ease.

This experience, forged at the apex of extreme performance, defines Artura's DNA. Making it a thrillingly focused out-and-out supercar... that's also perfectly suited to cruising city streets in hushed electric mode.

PIONEERING QUALITIES

Creating the next-generation supercar required a bold philosophy.

All-new design language defines the shape of Artura. Sculpted by the laws of aerodynamics and shrink-wrapped around the car's structure. The cockpit design is trademark McLaren, redefined for the future. Driver focus is the first priority. Technology and controls are intuitive, precisely judged and beautifully detailed. Fingertip control, clarity and feel are set for maximum engagement.

Artura offers an exhilarating blend of performance and unparalleled driving dynamics – including lightning responses, exacting feedback and reassuring control. Whether you're enjoying the spine-tingling howl of the all-new V6, or the contemporary quiet of full electric mode.

INTOXICATING

NEW CORE ELEMENTS

The McLaren Carbon Fibre Lightweight Architecture (MCLA) is lighter, stiffer and stronger – a perfect platform for the new rear suspension design, E-Differential, Proactive Damping Control and Advanced Driver Assistance Systems (ADAS). It allows us to mount the light, powerful HV battery as low as possible, keeping the all-important centre of gravity low. Rewarding you with class leading acceleration and driving engagement, too.

The Artura petrol engine is also a dramatic new core development. As a V6, instead of a V8, its power output is exceptional. Lightness is gained, but power remains uncompromised.

The all-new 8-speed gearbox is boldly innovative. It doesn't need a reverse gear. It uses the E-Motor to move the car. Saving more weight and reducing complexity.

Wherever you look, wherever you drive, you will quickly appreciate Artura's original thinking.

INNOVATIVE
ENGINEERING
HAS TOUCHED
EVERY LAST
CONTOUR
OF ARTURA.

SPEED OF LIGHT

The beating heart of Artura is the brand new twin-turbocharged V6 engine. Weighing in at 50kg less than a V8, it produces the highest PS/ litre per KG of any V6 on the market. The 120° 'vee' angle provides optimum weight distribution. The ruthless weight saving philosophy is applied everywhere. The transmission. The E-Motor itself. From the core, to the shrink-wrapped body panels. The rear clam is Superformed as one sweeping elegant aluminium panel – there is no separate rear deck and fender design.

Artura has a dry weight of just 1395kg. It is the lightest plug-in hybrid supercar, with the lowest centre of gravity.

The all-new McLaren Carbon Fibre Lightweight Architecture (MCLA) is a masterclass in weight saving. Its carbon fibre occupant structure is lighter than the previous MonoCell design, despite featuring a new battery compartment, aero surfaces, B pillars and door fixings. It weighs just 82kg.

Running through the new platform is our automotive-first Ethernet electrical architecture and Telematics Control Unit (TCU), allowing Over-the-Air-updates. It isn't simply faster than conventional designs, it also saves up to 25% in weight.

LIGHTNESS IS PRICELESS.

A FUNDAMENTAL QUALITY THAT UNDERPINS EVERY McLAREN.
UNLOCKING INCREDIBLE PERFORMANCE. AND STUNNING AGILITY.

DRY WEIGHT
1395KG

THE SUPERCAR. ELECTRIFIED.

There are plug-in hybrids. And ultra-light supercars. Artura blends the two in a dramatic new way.

The scintillating V6 with new twin turbochargers combines with a potent, lightweight E-Motor to deliver incredible performance and instant torque.

When the power of petrol and electricity are working together, Artura produces a stunning 680PS – with the E-Motor adding up to 95PS and 225 Nm of torque, on demand. In pure EV mode, you can drive 19 miles in zero-CO2 quiet, at up to 81 mph. With the glorious new petrol engine, you unleash a spine-tingling snarl and a tidal wave of unrelenting acceleration.

The transition between petrol and electric power is seamless and programmed to make the absolute best of both.

Four settings give you ultimate control of your drive: E Mode enables electric-only powertrain, while three distinct handling modes – Comfort, Sport and Track – adjust agility. Allowing you to cruise with maximum efficiency and explore the power, responses, and balance of your car.

A close-up, artistic photograph of a car's front end, focusing on the headlight and grille. The car is a deep blue color. The headlight is illuminated, showing a bright yellow light. The grille features a series of horizontal slats. The text "ELECTRIFYING" is overlaid in a white, serif font across the center of the image.

ELECTRIFYING

PURE DRIVING PLEASURE

Packed with innovation. Meticulously designed for optimum weight distribution. Yet, like any great engine, far more than the sum of its parts. Artura's beating heart proves it. Exhibiting the classic V6 howl, peaking at 585PS and 8,500 rpm. A truly soul-stirring performance.

Responses are linear. Pick-up is instant. The E-Motor is positioned to deliver huge amounts of instant torque, and combines with the petrol engine to generate even more power: 680PS in total.

BEAUTIFUL SIMPLICITY

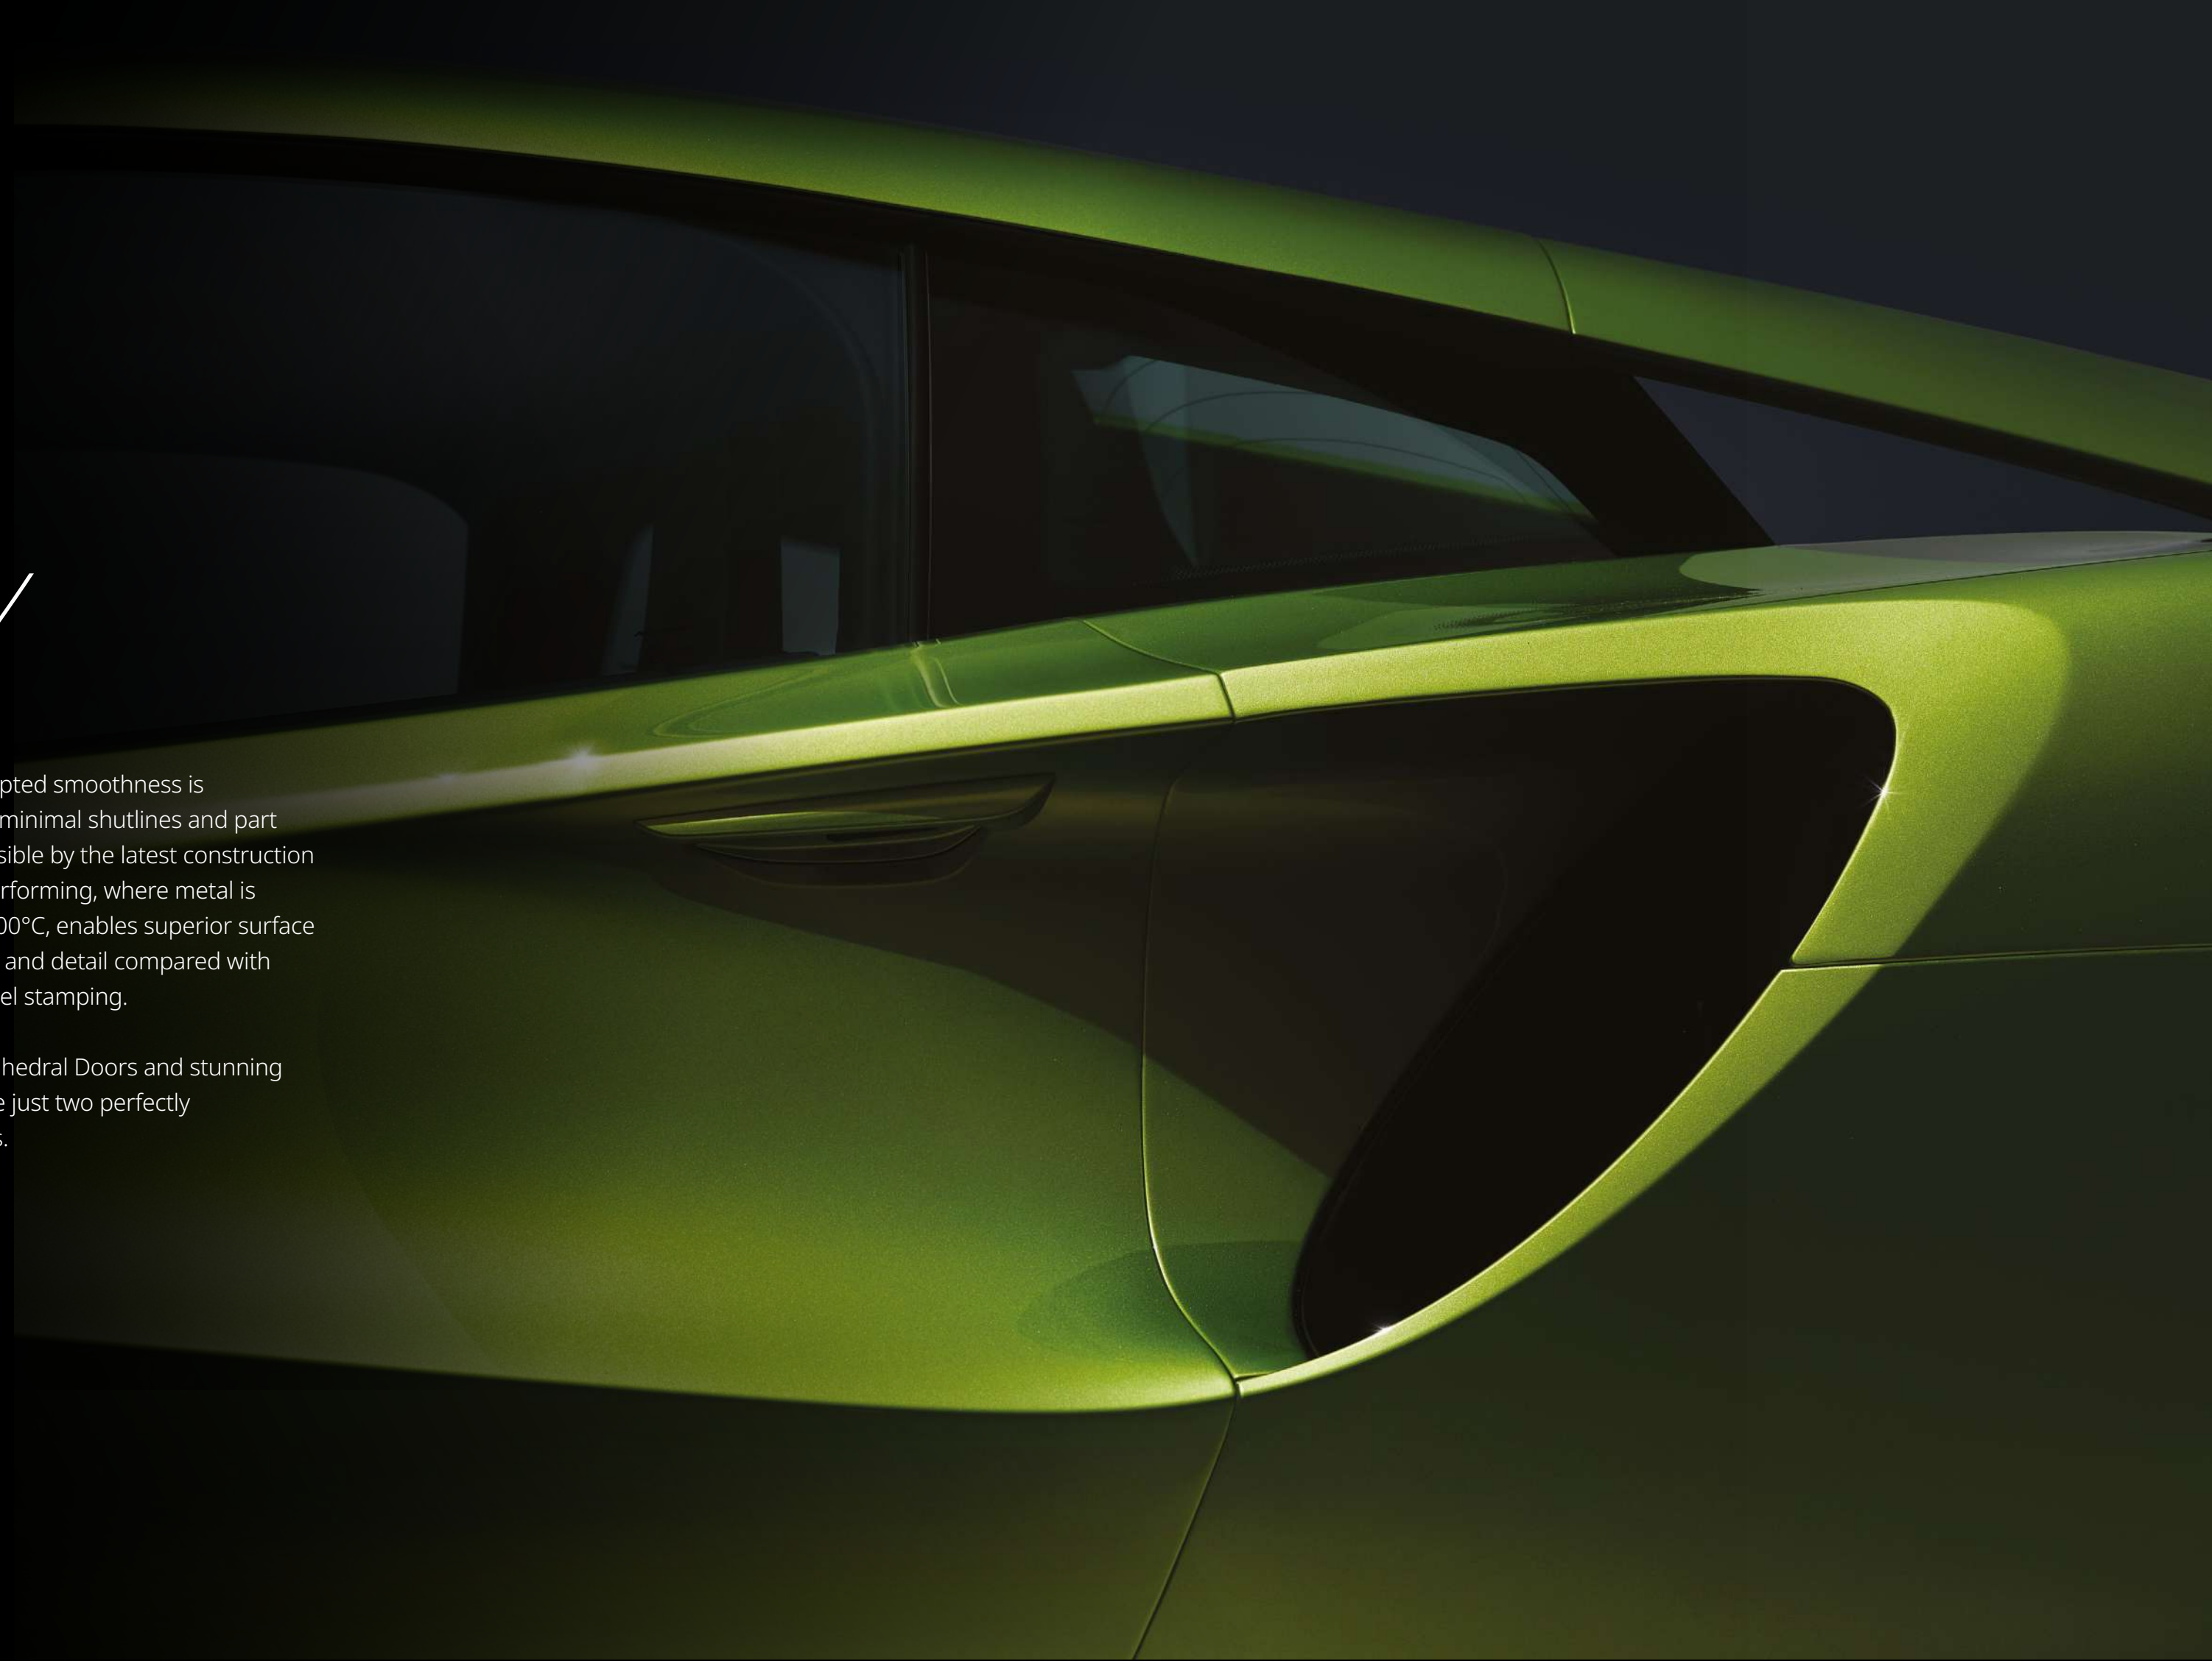

Low, taut and beautifully simple, Artura is the embodiment of McLaren's design language: everything for a reason. Form strictly following function.

Rigorous aerothermal work has shaped the car. Intakes, vents and concealed door ducts channel clean air for optimised aerodynamics, or feed cooling air to the eHVAC system and the low temperature radiators. Elegant buttresses guide air around the glasshouse and over the rear deck, cooling the powertrain chimney and feeding the rear spoiler. A dramatic split-level diffuser completes the radical aero package.

The sense of sculpted smoothness is strengthened by minimal shutlines and part joins – made possible by the latest construction techniques. Superforming, where metal is shaped at over 500°C, enables superior surface definition, quality and detail compared with conventional panel stamping.

The trademark Dihedral Doors and stunning rear clamshell are just two perfectly formed examples.

DEFINITION.
QUALITY.
DETAIL.

ADVANCED DRIVER FOCUS

Built from the finest materials, using the latest construction methods. Uncluttered and single-mindedly shaped around the driver, Artura brings new levels of advanced usability. Comfort. And quality.

The design and placement of major driving controls are guided by our 'eyes on the road, hands on the wheel' approach. They can be adjusted and fine-tuned without taking your hands from the steering wheel. Leaving your focus firmly on the drive. And only the drive.

Artura also features a new McLaren Clubsport seat design. Lighter than ever, with an innovative adjustment mechanism to ensure optimum support height and angle. Add in the new, larger cabin design – offering significantly more leg, knee and shoulder room – and Artura means you can enjoy more comfort. With all the performance advantages of a single-piece racing setup.

Infotainment and connectivity are transformed. The interface between car and driver is close and intuitive – delivering a rapid, smooth and simple experience. Two crisp, bright HD screens display rich colours, pin-sharp resolution and 3D graphics. Key innovations include the very latest McLaren Track Telemetry, natural language voice control, Emergency Call and Over-the-Air software updates. As you'd expect, Artura will mirror your smartphone with Apple CarPlay® and Android Auto™.

I N N O V A T I O N

A RICHER EXPERIENCE

The unparalleled driving dynamics of a McLaren always deliver unique intensity behind the wheel. Through performance, handling, responses and feel. The sound, sensations and drama add up to a level of engagement that thrills – and invites you to become a part of the car.

The all-new lightweight architecture provides a perfect platform for our pioneering advances. The new rear suspension offers exceptional stability. Then there's our first use of the E-differential – giving you greater control over drifting at the limits, jaw dropping traction out of corners, and better all-round balance.

Artura puts a host of dynamic control technology at your fingertips. Variable Drift Control (VDC) allows you to fine tune ESC performance using an intuitive slider on the Central Infotainment Screen. The three handling modes – Comfort, Sport and Track – are selectable via a simple rocker switch. On top of this, state-of-the-art Proactive Damping Control responds to changing road conditions within 2 milliseconds – without you lifting a finger.

E-DIFFERENTIAL.
VARIABLE DRIFT CONTROL.
PROACTIVE DAMPING CONTROL.
HANDLING MODES:

COMFORT, SPORT AND TRACK.

NEXT-LEVEL PEACE OF MIND

To reinforce our commitment to enduring quality and confidence-inspiring ownership, Artura is backed by a new McLaren warranty, including:

- 5 YEAR UNLIMITED MILEAGE
VEHICLE WARRANTY
- 6 YEAR/45,000 MILES (75,000 KM)
BATTERY WARRANTY
- 10 YEAR ANTI-PERFORATION WARRANTY
- 5 YEAR ROADSIDE ASSISTANCE COVER

This is the kind of assurance that allows you to drive your Artura without limits. Safe in the knowledge that it's comprehensively covered by the people who created it.

MAINTAINING THE NEXT GENERATION

To keep Artura performing at its best, it needs to be serviced at a McLaren Retailer every 9,000 miles (15,000 km), or after 12 months if that arrives sooner.

Our expert Retailer technicians apply precisely the same meticulous standards when maintaining your Artura as those that first shaped it, here at MPC. So, you can relax knowing your Artura is in the best possible hands.

THE ART OF THE POSSIBLE

At McLaren Special Operations (MSO), the limits are set only by imagination. From a one-off finish, material or colour that reflects your individuality. To crafting a unique car that breaks the boundaries of conventional personalisation.

We call it 'the art of the possible'.

Whatever your inspiration, our unique experience and creative ability can make it happen. From ideation to realisation, we work closely with you to shape your vision.

UNLEASH YOUR INNER EXPERIMENTALIST.
CREATE AN ARTURA THAT'S SINGULARLY YOURS. AND YOURS ALONE.

IT BEGINS WITH YOUR CAR...

Owning a McLaren is different in so many ways. And it's about more than experiencing the exhilaration of the world's most accomplished supercars.

It opens up the chance to interact with our team and other McLaren owners. To be part of a family of like-minded enthusiasts. And get the absolute maximum from your McLaren.

That's because we offer driving and lifestyle events all across the world... from the challenging to the chilled. After all, your Artura was born to devour the finest roads.

So why not hone your skills with professional coaching on the world's most iconic racing circuits. Get some drift time driving on ice. Or go for the more leisurely approach and join one of our scenic driving tours. And, of course, you'll enjoy exclusive chances for VIP access to selected world-class motorsport events.
